Colors may vary due to monitor settings and devices.

Runways across the globe lined up to spotlight this trend. This season eyeliner takes on many new meanings. Replace your traditional black liner by smudging a **smoky brown** liner under lower lash line and a thin line on top. Colored liner in shades of **green, navy, purples** and **plums** are also framing eyes while the **black heavily rimmed eye** still holds its place on the catwalk.
